PROFILE

Product designer with 5+ years of experience designing government, public-health and SaaS platforms, from a national immunization dashboard for the Government of Nepal to a NIDCOM-backed property platform for Nigerians in the diaspora. I also build what I design: web apps, mobile apps and AI tools in React, Next.js, React Native and Supabase. I do my best work on complex systems, where clear structure helps people make better decisions, and I am comfortable leading in cross-functional agile teams or working independently.

SKILLS

Design	Figma (expert), design systems, wireframing, prototyping, user journeys, user research, design thinking, WCAG accessibility, Adobe Creative Suite
Build	HTML, CSS, JavaScript, React, Next.js, React Native, Supabase, Vercel, Git and GitHub, design-to-code handoff
AI	AI product design, grounded AI agents, prompt engineering for UX, custom Claude skills
Product	Product strategy, trust-centred design, lean UX, agile, market research, stakeholder management, team leadership

EXPERIENCE

Product Designer · Brik CRM — Jul 2026 – Oct 2026

- Designed web and mobile features and updates for the Brik CRM SaaS platform.
- Led visual design across the product and brand, including the logo, illustrations, social media assets and interface components.

Fractional COO · Goju Design Solutions Ltd — Jan 2026 – Present

- Built the company's operating context: an SOP repository and core values combined into one source of truth.
- Set up operational systems that automate project tracking, resource allocation and cross-functional communication.
- Defined brand and financial guardrails that keep project quality consistent and work profitable.

Lead Product Designer · Sydani Group — Oct 2024 – Apr 2026 (promoted to Staff, Mar 2025)

- **Home and Abroad** (homeandabroad.ng): led UI/UX design through the November 2025 launch of a cross-border real estate platform for NIDCOM and the Federal Government of Nigeria, then managed post-launch design updates and growth.
- **Coverage Trackr** (coveragetrackr.com): designed and scaled a micro-planning tool for Nigeria, then a localised version for Sierra Leone (sl.coveragetrackr.com).
- **Nepal Immunization Dashboard**: designed an accountability framework dashboard tracking governance, finance and programme indicators for the Government of Nepal.
- **Hemo Trackr**: standardised and completed the interface for a blood inventory system linking blood banks, donors and health facilities.
- **SYDAAR LMS** (sydaar.com): designed a gamified learning platform for NICRAT staff training, with courses, quizzes, badges and leaderboards, and a white-label version for Amref.

- **Manorr** (themanorr.com) and **SwiftEntry** (theswiftentry.com): improved user flows for estate management and corporate visitor management systems.
- Produced logos, social media assets and large-format print materials across the portfolio.

UI/UX Designer · Asher Corporation — Aug 2023 – Feb 2024

- Delivered a mobile-first responsive design so agents and tenants could use the platform reliably in the field.
- Ran user research to refine property management interfaces for a wide range of users.
- Worked with engineering and product teams to align design decisions with business and ROI goals.

SELECTED PROJECTS: DESIGNED AND BUILT

Pathfinder AI · AI product
A career intelligence tool that finds international roles, checks visa and remote eligibility with evidence, and drafts tailored CVs with grounded AI agents.

Babylon Purse · Next.js 15, Supabase
An income and expense ledger built on the money rules of *The Richest Man in Babylon*: save first, clear debt, control spending.

AS5 Group · as5group.com
The production website for an Abuja real estate development and construction company, hand-coded with no framework.

PayTrack SME · IT PGD final project
A payment management system for small businesses: payment requests, reconciliation and reports. Designed in Figma, built with JavaScript and Supabase.

GM-PT · React Native
An offline-first project tracker for iOS and Android built around one rule: finish what you are working on before starting something new.

Custom Claude Skills · AI tooling
Skills that teach Claude to watch videos, build Blender scenes and turn tutorials into a reusable skill library.

EDUCATION

Postgraduate Diploma (PGD), Information Technology · Nile University of Nigeria — Mar 2026 – Oct 2026

- Final project: PayTrack SME, a payment management system tested with two Abuja SMEs.

B.Tech, Meteorology & Climate Science · Federal University of Technology, Akure (FUTA) — Jan 2017 – Aug 2023

National Youth Service Corps (NYSC) — 2024 – 2025
